Introducing Evo Concepts

Company History

Established in 2015, Evolution Concepts with years of hands on and operational experiences in specialized ship building. We bring with us valuable insights on current market trends and relationships with other key stakeholders in the international marine and offshore community.

Mission

We aim to successfully build and deliver ships that exceed international standards as well as client expectations while at the same time realizing actual cost savings in return to our clients.

Vision

We seek to steer towards a zero emission and sustainable Marine Industry and Green climate future.

Values

DEVELOPING INNOVATIVE STRATEGIES

MAXIMISING RETURNS

Our Services

Shipbuilding & Design

With in-depth knowledge of budgets, bidding processes and construction methods, we plan, monitor build/construction progress and ensure a smooth process at all stages of ship design/building.

Bespoke Designs

While others thrive on a “one size fits all” mindset, Evo Concepts understands that to truly serve our client needs, we must present them with solutions that are perfectly tailored for their needs.

Engineering, Procurement and Construction

Projects Management

EVO takes on the role of total service provider and provides the client with a complete view over the entire project scope, thus ensuring an optimally efficient execution of a new build project.

Notable Projects

Evo Concepts has been involved in the Planning, Design/Build or Completion Delivery of the following projects

Self Elevating Unit

Anchor Handling Towing Supply (AHTS)

Notable Project (Cont'd)

Project L ALUMINIUM Vessel consists of two vessels, perfectly tailored towards the needs of our client.

Hydrographic Survey Vessel

Patrol Vessel Catamaran

Design Philosophy

GPS Philosophy

Evo Concepts has embraced a “3 Green Philosophy” Approach – known as GPS (Go Green, Fit For Purpose, System Flexibility).

Go Green

By utilizing a hybrid diesel-electric / diesel-mechanic propulsion system, the end user benefits from the flexibility of the operators being able to run a minimum number of engines at fuel efficient loading

Fit For Purpose

The multiple propulsion modes are designed to match the different operational requirements giving optimal fuel consumption and reduced emissions

System Flexibility

System flexibility allows vessel to work safely even with some systems down for maintenance

Corporate Profile

Company Name	Evolution Concepts Pte Ltd
Main Office	3 Ang Mo Kio St 62, Link@AMK, #05-15, Singapore 569139
Shanghai Office	No. 28 Jinqiao Road, Unit 901, New Jinqiao Building, Shanghai, China 中国上海浦东新区新金桥路 28 号新金桥大厦 901 室
